

Lucas Selani

Senior Mobile Engineer (Flutter) | Software Architect

Brazil (Open to Remote) | +55 35 998346484 | selani.lucas@gmail.com | linkedin.com/in/lucasselani | github.com/lucasselani

PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years of experience building end-to-end systems — from backend services in Rust, TypeScript, and Java/Kotlin to client-side applications in Flutter and native Android/iOS. At Will Bank, developed high-performance tooling in Rust and Server-Driven UI architectures that served 10M+ users. Strong background in systems architecture (Clean Architecture, monorepos, CI/CD), automation, and LLM integration.

TECHNICAL SKILLS

- **Languages & Backend:** Dart, Kotlin/Java, Rust, TypeScript.
 - **Architecture & Systems:** Clean Architecture, Server-Driven UI (SDUI), APIs, Micro-frontends, Microservices, Monorepos.
 - **DevOps & Tooling:** CI/CD (GitHub Actions), Git, Automated Testing, Playwright.
 - **Mobile & Client-side:** Flutter, Android, iOS.
 - **AI & Automation:** LLM Integration (Ollama, Gemini), FFmpeg.
-

PROFESSIONAL EXPERIENCE

Will Bank | *Remote Senior Mobile Engineer* | Nov 2024 – Jul 2026 *Fintech with 10M+ users. Focused on Fraud Prevention and Security.*

- Engineered the "Cash-in/Cash-out" security flows, designing adaptive challenge mechanisms that analyze user data in real-time to approve transactions.
- Architected a **Server-Driven UI (SDUI)** module to decouple security challenges from app releases, enabling instant hotfixes and A/B testing without App Store reviews.
- Developed high-performance tooling using **Rust** to serialize backend structs into JSON for the Flutter SDUI engine, ensuring type safety and p99 latency compliance.

Unico IDtech | *Remote Senior Flutter Developer* | Jun 2020 – Nov 2024 *Brazil's leader in digital identity. Scaled the core mobile product.*

- Architected and scaled a multi-module Flutter super-app serving **200k+ active users**, integrating secure facial biometrics and digital documents.
- Designed the foundational **Core Module** and **Design System**, creating a reusable widget library used across all company Flutter projects.
- Established a robust CI/CD pipeline within a **Trunk-Based Monorepo**, automating testing and enabling a reliable weekly release train to App Stores.

Toodoo | *São Paulo, Brazil* **Mid Android Developer** | *Jan 2019 – Jun 2020*

- **Burger King & Natura:** Developed high-impact features for major clients, including a digital banking module for Natura and geofenced promotions for Burger King.
- **Wooza:** Built a Native Android app from scratch to facilitate phone carrier portability.

Inatel Competence Center (ICC) | *Minas Gerais, Brazil* **Software Developer & QA** | *Jul 2014 – Jan 2019*

- **Backend (Ericsson Project):** Developed backend solutions for a large-scale telecom project with 400+ employees.
 - **Mobile:** Assisted in the development and maintenance of native Android applications for 2 years.
 - **QA Specialist:** Started career with 3 years in Quality Assurance, conducting security, performance, and usability testing.
-

KEY PROJECTS

Darkrunner - Automated Video Pipeline | *Private Monorepo Technologies: TypeScript, Remotion, Playwright, Node.js, LLMs*

- Designed a fully autonomous content creation pipeline that orchestrates AI agents (Scripting, Planning, QA) to produce YouTube videos programmatically.
 - Built a **TypeScript** ecosystem integrating **Remotion** for programmatic video editing and **Playwright** for web automation.
 - Implemented local AI integration (Ollama, ComfyUI) to generate assets (images, TTS, scripts) on demand.
-

EDUCATION

BSc in Computer Engineering | *2014 – 2018* Inatel - National Institute of Telecommunications

Languages: Portuguese (Native), English (Advanced/C1)
