

Lucas Selani

Senior Software Engineer — Fullstack & Mobile (TypeScript/Node.js · Rust · Flutter)

Brazil · Remote (UTC-3, overlaps US and EU hours) · Full-time or contractor

selani.lucas@gmail.com · +55 35 99834-6484 · linkedin.com/in/lucasselani · github.com/lucasselani

SUMMARY

Senior Software Engineer with 8+ years building products end to end, from backend tooling in Rust and TypeScript/Node.js to Flutter and native Android apps, in fintech (10M+ users) and digital identity. Architected a full-stack Server-Driven UI (SDUI) platform at Will Bank: a Rust layer serializes backend models into a typed JSON contract rendered by a Flutter engine, so security flows ship without app-store releases. Currently building a TypeScript multi-agent AI orchestration pipeline.

SKILLS

- **Backend & Languages:** TypeScript, Node.js, Rust, Kotlin, Java, Dart, REST APIs, JSON contracts/serialization, Microservices
- **Architecture:** Server-Driven UI (SDUI), System Design, Clean Architecture, Modular Architecture, Monorepos, Micro-frontends, Design Systems
- **Mobile:** Flutter, Android (Kotlin/Java), iOS
- **DevOps & Quality:** CI/CD (GitHub Actions), Trunk-Based Development, Git, Automated Testing, Playwright
- **AI & Automation:** LLM agents, AI orchestration, LLM integration (Ollama, Gemini), ComfyUI, Remotion, FFmpeg

EXPERIENCE

Senior Software Engineer — Independent (Self-employed) | Jul 2026 – Present

- Building **Darkrunner**, a **TypeScript/Node.js** multi-agent AI orchestration pipeline (monorepo) where scripting, planning and QA agents produce YouTube videos end to end with no manual editing.
- Integrated **Remotion** for programmatic video rendering and **Playwright** for web automation, with local model inference (**Ollama**, **ComfyUI**) generating images, TTS and scripts on demand.
- Stack: TypeScript, Node.js, LLM agents, Remotion, Playwright, Ollama, ComfyUI, FFmpeg.

Senior Mobile Engineer — Will Bank | Nov 2024 – Jul 2026

Fintech with 10M+ users · Fraud Prevention & Security · Remote · Engineering department closed in Jul 2026.

- Architected a **Server-Driven UI (SDUI)** platform spanning backend and client, decoupling security challenges from app releases and enabling instant hotfixes and A/B tests without app-store review.
- Built high-performance **Rust** tooling that serializes backend structs into the JSON contract consumed by the Flutter SDUI engine, keeping type safety end to end and meeting p99 latency requirements.
- Engineered the **cash-in/cash-out security flows**, designing adaptive challenge mechanisms that analyze user data in real time to approve transactions for a 10M+ user base.
- Stack: Rust, Flutter/Dart, Server-Driven UI, JSON APIs, CI/CD.

Senior Flutter Developer — Unico IDtech | Jun 2020 – Nov 2024

Brazil's leader in digital identity · Remote.

- Architected and scaled a multi-module **Flutter super-app** serving **200k+ active users**, integrating secure facial biometrics and digital documents.
- Designed the foundational **Core Module** and **Design System**, a reusable widget library adopted by every Flutter project in the company.
- Built the **CI/CD** pipeline for a **trunk-based monorepo**, automating tests and enabling a reliable weekly release train to the App Store and Google Play.
- Stack: Flutter, Dart, Clean Architecture, Modular Architecture, Monorepo, GitHub Actions.

Android Developer (Mid-level) — Toodoo | Jan 2019 – Jun 2020

São Paulo, Brazil.

- Delivered high-impact features for enterprise clients, including a digital banking module for **Natura** and geofenced promotions for **Burger King**.
- Built a native Android app from scratch for **Wooza** to handle phone carrier portability.

Software Developer & QA — Inatel Competence Center (ICC) | Jul 2014 – Jan 2019

Minas Gerais, Brazil.

- Developed **Java backend** solutions for a large-scale **Ericsson** telecom project with 400+ people.
- Developed and maintained native Android applications for 2 years; started in QA (3 years) with security, performance and usability testing.

EDUCATION

BSc in Computer Engineering — Inatel (National Institute of Telecommunications) | 2014 – 2018
